

Cantilever Umbrella Canopy

The Cantilever Umbrella has a single column to ground offset at one edge of the canopy. It is a conical form the same as our standard tensile fabric umbrella but gives you the option to have a clear span under the canopy. The drawings on this page will give you a good idea of how this design works.

You will find full details of the canopy structure and sizes available in the table below. You can also refer to our comprehensive canopy buyer's checklist to help you to specify the canopy that best suits your needs and make a fair comparison between different potential suppliers.

Key Features

Sizes: 3.2mx3.2m, 4mx4m, 5mx5m (bespoke sizes on request)

Can they be linked together: Yes

Canopy Material: PVC polyester (highly coated), A range of 40 colours available, QA ISO 90001

Frame Material: Steel (CE mark)

Frame Paint Specification: Powder coated. RAL colours available

Gutter: No (can be added on request)

Wind Rating: 120km/h

Snow Loading: 10cm

Fire Rating: M2 / B1 / BS 7837, B-s2,d0 (class 0 / A2 fabric available on request)

Waterproof: Yes

Expected Design Life: 20+ years

Fabric Warranty: 10 years (subject to colour)

Foundations: Simple structural reinforced concrete

Installation: 100m² per day average

Accessories Available: Branding, Post protector, Lighting, Heat, Waste bins

Maintenance: Virtually maintenance free. Simple annual clean and maintenance check
