

Gullwing Canopy

The Gullwing is a beautifully elegant cantilevered tensile fabric structure that can be specified with one or two wings. The central spine can accommodate a variety of leg positions so that they can be sited to avoid any obstructions in the ground or doorways if it is used for a walkway canopy. The Gullwing is therefore a very versatile structure for walkways and entrances and is available in a number of widths as standard.

See the table below for details. Please also refer to our comprehensive canopy buyer's checklist to help you to specify the canopy that best suits your needs and make a fair comparison between different potential suppliers.

Key Features

Sizes: Width 2m, 4m, 6m. Length as required (custom widths on request)

Can they be linked together: Yes
